

WALLBOARD'S SKIMMING KNIVES

ARE DESIGNED TO PERFECTLY COAT WIDE AREAS WITH ONE WIPEDOWN FOR LARGE AREA SMOOTHING. THE BLADES HAVE ROUNDED EDGES TO STOP MUD GOUGING AND THE SHAPE ALLOWS FOR GREATER SURFACE CONTACT AND BLADE FLEX GUARANTEEING FLAWLESS FINISHING.

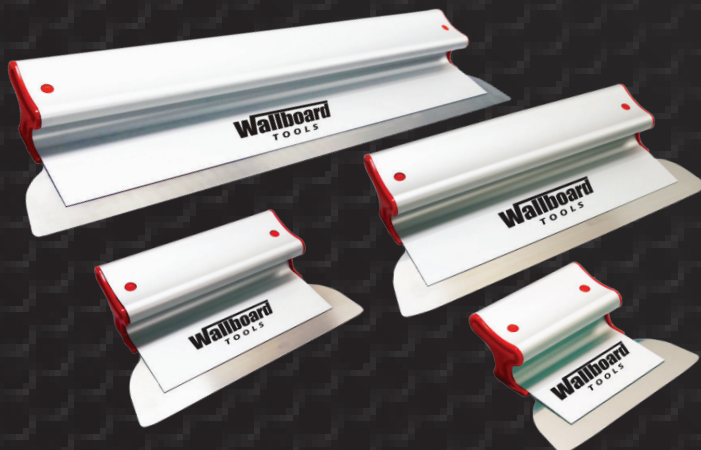

The blades are made in Europe from high quality stainless steel that resists corrosion with the flexible blade designed by a high quality tool manufacturer.

The comfortable shape aluminium handle delivers excellent control allowing large blade area contact with plasterboard surfaces.

Available in 4 convenient sizes 175mm for taping, 250mm & 350mm for joint finishing & 600mm for butt joints and surface smoothing.

Removable plastic ends allow the user to replace damaged blades extending the life of the tool.

The lightweight and durable fibreglass and aluminium extendable pole extends to 1860mm ensuring a long reach for finishing ceilings.
