SIDE PLATES

SuperLite Automatic Taper

Tapepro Drywall Tools released the first carbon fibre plastering tools with the SuperLite range of flat box handles in 2015. Now, the SuperLite update on the already proven Tapepro Automatic Taper (AT-2000) joins the stable of highly sought after Tapepro carbon fibre tools.

The addition of both the carbon fibre and titanium components has reduced the overall weight of the taper by more than 10%, with the added benefit that carbon fibre is more temperature stable and won't dent.

Design improvements for the SuperLite Auto Taper (AT-SL) include the carbon fibre main tube with a reinforced section for the quick release head. The lightweight but durable titanium side plates contribute to the additional weight savings. While the carbon fibre control tube that includes adjustable tube rollers allows for a smoother, more controlled action. To check out the full list of upgrades go to the Tapepro website www.tapepro.com.au

When purchasing the Tapepro SuperLite Auto Taper you not only obtain the most functional Auto Taper on the market but also the best presented tool for a professional plasterer's kit.

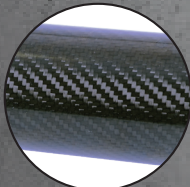

Adjustable control tube rollers

Quick release head

Titanium side plates

Lightweight carbon fibre

10% lighter than AT-2000

Temperature stable carbon fibre

Impact resistant carbon fibre

Designed and made in Australia
