***Perfect for archways or free flowing plaster art***

The Archway Shadow Bead is used to create a 10mm x 10mm shadow reveal effect around columns or curved walls, flexing to a radius of 1200mm minimum inside radius and 600mm outside. A heat gun can be used to smooth out the return leg if it wrinkles. With a 32mm mud leg, the 8mm tear away strip acts as a guide for finishing and protecting the adjacent surface from plaster to leave a clean reveal edge that makes cleaning up a breeze.
