## SELF ADJUSTING BEADROLLER

Tapepro's Self-Adjusting Bead Roller is ready to make any angled corner bead from inside 90° to outside 90° extremely easy to bed in! It automatically adjusts to the angle required, so no manual setting is needed. The unique flexible bands provide spring action and increased control while the larger rollers spin slower for less compound flick. It's also perfect to use on extendable handles, with a very stable operation.

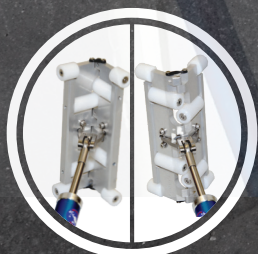

- Self adjusting roller for all angle corner beads - inside 90° to outside 90°!
- No manual setting required
- No tipping, perfect for use on extendable handles
- Outside rollers increase width for wider bead application
- Minimal compound flick
- Unique flexible bands provide spring action and increased control
- Works well with all mud-on beads: No-Coat 325 & 450, Strait-flex, Trim-tex, Paper Faced metal beads and more!
