Can be used with Base
(chemical setting)
compounds

Apply joint compound, bed-in tape then perfectly glaze and feather internal corners with the Slayer Corner Kit from Tapepro. The Slayer Corner Kit includes every tool required to finish internal corners fast and with less strain on the body. Packaged together in an aluminium case for safe storage and easy transport.

What's in the kit:

Tapepro Compound
Applicator Tube
CA-T

Draws compound from the bucket and can be fitted with a wide range of mud head attachments. Use with the AH-38 to apply joint compound to internal corners

Angle Head
Attachment
AH-38

The AH-38 mud head fits to the Compound Applicator Tube to dispense the correct amount of compound to 90° internal corners
