

STEALTH SANDER

The Stealth Sander from Tapepro is a 90° corner sanding tool that will solve some of the typical sanding problems plasterers come across. This geometric masterpiece allows you to feather the outer edge with the 95° end and sand the corner apex with the 85° end. The result? Flawless corner sanding every single time. Have thick edges? You'll have no problems removing them with the Stealth Sander. It fits Tapepro corner finisher handles, simply snap them on.

For the ultimate finishing touches to internal angles, finish with the Stealth.

85° end for
sanding corner apex

Fits Tapepro
corner finisher handles

95° end for
feathering outer edge
