NO-COAT ULTRATRIM CORNER TRIMS

No-Coat Ultratrim pre-cut stick lengths withstand severe impacts, settling and seismic movements reducing cracking, denting, chipping or peeling. Ultratrim is easy to install and delivers perfect corners in record time.

- Tapered high strength co-polymer core
- Joint tape on internal surface
- Formulated surface paper that reduces cracks and abrasions
- Applies quickly with base compound
- For fast results use No-Coat Outside 90 Roller

PAPER FACED METAL CORNER BEAD

REDUCE COSTS These beads are quick to install and require less mud than traditional trims
KEEP IT STRAIGHT The metal component allows the user to create sharp, straight corners
ELIMINATE NAIL/STAPLE POPS No stapling is required for the installation of Paper Faced Bead
CREATE CORNERS FASTER Can be bedded and second coated with the assistance of Tapepro Tools
REDUCE SCUFFING The paper tape covering the bead has a coating that resists scuffing
NO PRIMING Paper Faced Beads have no exposed metal and don't require priming

Using Paper Faced Metal Corner Beads can speed up the corner finishing process while providing a superior low profile finish.

FAST CORNERS WITH TAPEPRO TOOLS

- ① Load Compound Applicator Tube (CA-T)
- ② Apply compound with Angle Head (AH-38)
- ③ Place Paper Faced Bead into the internal
- ④ Roll the bead into the centre of internal
- ⑤ Use Straight Glazer (SG-55/75) to glaze internal
- ⑥ Once first coat dries lightly sand if required
- ⑦ Apply second coat with CA-T & AH-38
- ⑧ Glaze off second coat with SG-75/90 & sand

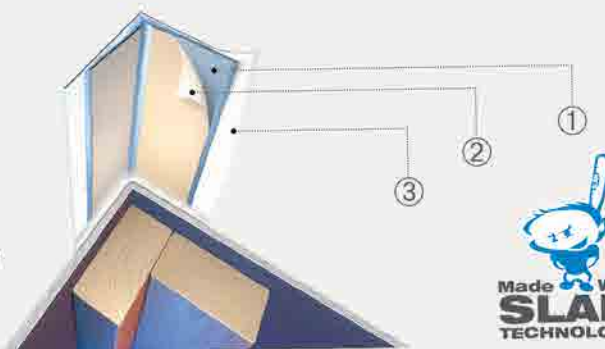

CORNER TAPES

ULTRAFLEX CORNER TAPES

Whether finishing off-angles, archways, inside or outside corners, NO-COAT® offers a complete corner system for every job. And with NO-COAT tools and accessories, the application of No-Coat corners is easier and more efficient.

- ① Tapered High Strength Co-polymer Core withstands severe impacts. Won't rust. Requires less mud.
- ② Joint Tape permanently bonds corner to plasterboard with Base Compound.
- ③ Formulated Surface Paper reduces cracks, chips and peels, resists abrasion, and accepts any finish.

SLAM® Technology - A Breakthrough in Drywall Corner Finishing. NO-COAT's Structural Laminate (SLAM) Corner System actually becomes part of the structure. SLAM Technology integrates three key components that deliver superior strength and durability, flexibility, faster installation and dramatic bottom line savings.

LEVELLINE's® Tapered Profile Design eliminates installation headaches and callbacks. Install off-angles, inside and outside corners faster and easier with LEVELLINE's tapered flex design and new applicator box. Our flex goes straight from the box or roll onto the wall, and requires less mud to apply and finish. LEVELLINE's superior corner construction (tapered plastic core, joint tape and formulated surface paper) ensures corners will not split or dent. LEVELLINE can also withstand structural settling from green timber and movement without cracking or popping off the wall.

STRAIT-FLEX CORNER TAPES

ORIGINAL

Original is the most versatile, multi-purpose plastering tape from Strait-Flex. 90° outside corners, inside corners, and angles can be expertly finished with Strait-Flex Original Corner Bead. Original resists dents and paint chipping, cuts easily with a utility knife or scissors, is applied with all-purpose joint compound, and will not rust. Manufactured from Strait-Flex's patented composite material, it is extremely strong and will not fuzz-up when sanding.

ABC-123 Code	Barcode	Size	Ctn	ea Exc
SFO-100	656690123507	30.5m	12	\$60.70

- Creates perfect inside and outside 90° corners
- Designed for the range of angled corners
- Uses less compound, requires less sanding
- Great for bay windows and coffered ceilings
- Covers inside corners where gaps are present
- Slotted edges ensure superior bond

 Tape Width
60mm

 Roll Length
30.5m

SFO-100

TUFF-TAPE

Tuff-Tape is designed for flat joints and inside corners where paper tape has failed or where extra strength is required. Great for cement board applications or bath and shower areas where common corner leaks occur.

- Resists blisters, tears, and common cracking problems
- Is four times stronger than paper joint tape
- Second coat of compound can be applied immediately
- Requires very light skim-coat to finish
- Tuff-Tape is waterproof and won't rust

ARCH-FLEX

Arch-Flex Tape is designed for arched windows and doors or for curved walls, ceilings, soffits, staircases, barrel vaults, and groin cathedral ceilings. Is also perfect for free-form, custom plasterboard applications where a seamless installation is required.

- Produces smooth, professional-looking curves
- Patented tear strips allow for easy straight-to-curve transitions
- Resists dents, paint chipping and common cracking problems
- Installs using standard compounds
- No special tools or fasteners required
- Requires minimal use of compound

FIBAFUSE JOINT TAPE

FibaFuse is designed for professional tradesmen. FibaFuse is a mould-resistant glass mat plasterboard tape that is ideal for high-humidity and moisture-prone applications. FibaFuse is easy to cut and designed to retain its folds, making it efficient to install by hand on joints and in corners. Taping tools, Mud Boxes, banjos and automatic tapers also work well in applying FibaFuse and compound to seams. FibaFuse is porous, allowing the joint compound to become part of the tape for a stronger bond and reducing the possibility of loose tape and air bubbles.

15-8201

MOULD RESISTANT Increased mould protection for a safer environment

OPEN FIBRE DESIGN Fuses with compound to create stronger joints

PRE-CREASED For easy installation into corners

SMOOTH FINISH Eliminates blisters and bubbles that are common with other tapes

PROFESSIONAL GRADE PERFORMANCE

A superior option for demanding applications
