MUD SET OPTION

Mud Set Beads are installed with base compound only. These beads provide excellent impact resistance with a superior bond virtually eliminating cracking. This range of beads from Trim-Tex incorporates the I Beam technology found in the Rigid range. The I Beam allows beads to absorb impact and resist cracking while producing a sharper corner. The range of Mud Set Beads use Mud Lock technology and a specially engineered hole pattern to create a superior bond between PVC and Plasterboard. Mud Locks cover the entire mud leg of the bead greatly increasing the bonding area. Micro perforations allow the optimum amount of compound to pass through, enabling the bead to self level on the corner. After installation, Mud Set Beads bond so strongly to the wall – they almost become part of it. Mud Set Beads are the fastest to install in the Trim-Tex range. They can be installed using Automatic Tools, a Hopper or by hand without the need for staples or spray adhesive.

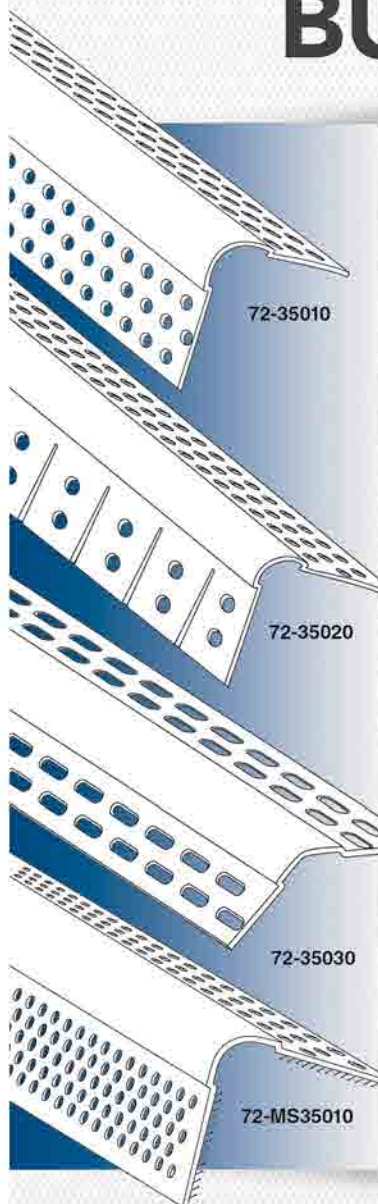

Expect more from your Corner Beads.

Trim-Tek Tear Away beads save time and labour while providing a clean finish. The Tear Away strip acts as a guide when setting but also protects against damage, compound and paint. After the trim is set the strip pulls away quickly - the result is a neat finish with nothing more to do. Many trims feature the time and stress saving Tear Away strip, including a range of L beads, shadow beads as well as the expansion trims.

MAGIC CORNER BEADS

Magic Corner is the perfect solution for off angled walls and raked ceilings. This bead combines rigid PVC on the mud legs with a soft centre allowing it to act as an expansion bead at any angle.
