CONQUER OFF-ANGLES AND LONG RUNS WITH TRIM-TEX ANGLE MASTER

TRIM-TEX DRYWALL PRODUCTS

Angle Master is another plastering solution designed by Trim-Tex. This revolutionary PVC Corner Tape can create any internal or external off-angle and make seamless long runs on bulkheads or plasterboard features. The tape is 82mm wide overall, both mud legs are covered in patented micro hooks which lock-in base compound to make the strongest possible bond between Angle Master and plasterboard.

Angle Master's paperless design eliminates common issues found when installing paper composite beads and tapes, like damage to the product or furring from too many passes and over sanding. The product has a lightly textured face for optimum compound and paint adhesion.

Available in 30.5m rolls, Angle Master is the easy way to create strong, sharp off-angle corners.

30.5m Roll

Micro Hooks

Adjustable
