PROTECT AGAINST STRUCTURAL MOVEMENT

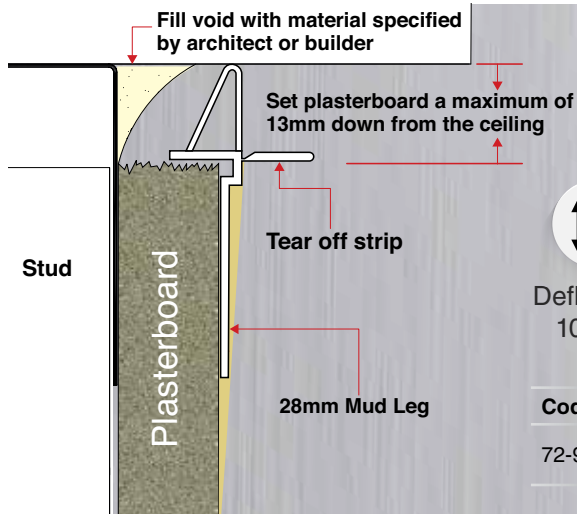

Wall Mounted Deflection Bead is a solution based plastering trim from Trim-Tex. The bead is designed to be installed against a ceiling or concrete deck where structural movement is a possibility and inside corner cracking can occur as a result.

The flexible gasket expands and compresses providing up to a total 10mm deflection. The trim features a 28mm mud leg used to set the bead and a 6mm Tear Away strip which when removed, results in a clean, finished edge minimising both labour and clean up.
